## CHIAMA IL 112

The Stop the Bleed campaign was initiated by a federal interagency working group convened by the National Security Council Staff, The White House. The purpose of the campaign is to build national resilience by better preparing the public to save lives by taking awareness of basic actions to stop life-threatening bleeding following everyday emergencies and man-made and natural disasters. Advances made by military medicine and research in hemorrhage control during the wars in Afghanistan and Iraq have informed the work of this initiative which exemplifies translation of knowledge back to the homeland to the benefit of the general public. The Department of Defense owns the 'Stop the Bleed' logo and phrase. Trademark pending.
